The background of the page is a photograph of a stage lighting rig. Several large, black stage lights are suspended from the ceiling, casting beams of bright blue and white light downwards. The scene is dimly lit, with the primary light source being the stage lights themselves. A solid green vertical bar is positioned on the left side of the page, partially overlapping the stage lighting image.

# ESSENTIAL STAGING

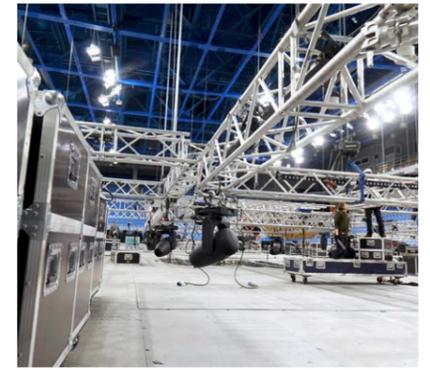

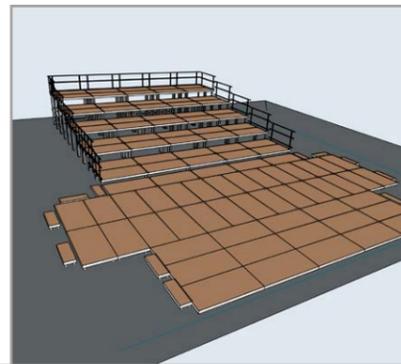

Cambridge, UK

[admin@essential-staging.co.uk](mailto:admin@essential-staging.co.uk)

[www.essential-staging.co.uk](http://www.essential-staging.co.uk)

Essential Staging is a Cambridgeshire based stage hire company who deliver their services and expertise across the UK. We are made up of a knowledgeable team of professionals who strive to turn your dreams into reality. What sets us apart is our attention to detail and our passion to make your event a success

# Bring your event to the stage

# Modular Staging

At Essential Staging, we use a Prolyte StageDex system.

StageDex is based on a special extruded aluminium profile. The top board is not bolted and glued to the frame which reduces noise and vibration.

Our modular staging is lightweight and portable, but amongst the strongest on the market. This means we are able to offer a quality product, whilst maintaining an efficient service for all size requirements.

Our staging system is versatile, so we can create single level, multilevel and tiered layouts as well as using casters to create a rolling riser. We also provide screw jacks for levelling, steps, rails, ramps, skirts and carpet if required.

Our modular staging offers:

Variety – We can provide staging of all sizes and shapes to achieve your event’s needs.

Flexibility – Staging is multifunctional and compatible with all our accessories including our round stage.

Quality – Strong and sturdy with a high load capacity of 750kg m2.

Because of the flexible nature of modular staging we can cater for events of all sizes including conferences and corporate events, parties, festivals, catwalks, festive and seasonal events, theatre productions, choirs, village and sporting events.

Boards Come in sizes:

- 2x1m
- 1x1m
- 2x0.5m

We can add carpet or vinyl for events that require a polished finish on top.

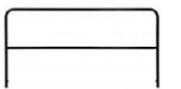

Deck to deck clamps ensure there is a strong connection between individual decks and absorbs the horizontal and vertical forces on the stage floor.

Using levellers achieves precision levelling of the deck and prevents vertical movement.

Safety rails can be used where access is not required to ensure safety on stage.

# Height and tiers

Versatility and strength are the key features of our staging and we can account for a range of heights, on flat or uneven surfaces.

We have legs that come in 1ft-6ft lengths, as well as screw jacks that add additional height and improve stability on uneven ground. It makes tiers possible for staging or seating. We use extra support for structures at the greater heights for stability.

We use aluminium legs that come in 1, 2, 3 & 4 ft lengths.

We can add screwjacks for other lengths and use packing for uneven floors.

We can use rolling risers for drums or any other moving platforms.

## Ramps

Some platforms, especially those at higher levels may require a ramp for equipment or people access. With a combination of different leg heights and screw jacks we can build access ramps for almost any height.

## Round Stage

A round (or circular) stage can create a real wow factor as it looks great from any angle. Our round stage is one of only a few available for hire in the UK and because it is compatible with our modular staging system, it has multiple configurations and uses.

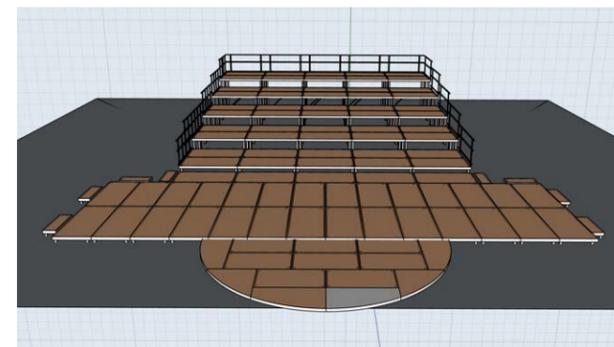

We also offer curved steps for safe access and carpet or vinyl can be added for an extra finish.

Available in 2, 4 or 6m diameter circle or as a semi-circle, oval or curved corner when paired with modular staging.

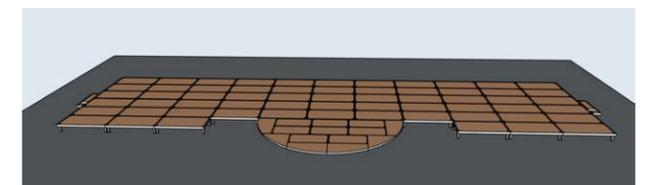

Available in multiple heights and even in circular tiers.

Can be used as a 45-degree curve front stage for a corner set-up.

This customised stage is good for a product showcase, events and fairs, choirs and bands, catwalks, raised bar (with the centre removed) and other events where a circular stage will give added wow factor.

The flexibility of the round and rectangular boards mean we can add round elements to endless arrangements of staging.

# Stage Cover

Because the dome cover looks great and offers an all-weather solution it can be used for festivals, radio shows, dance performances, Christmas light switch on, summer parties, fairs & fetes, outdoor weddings and other parties.

Our inflatable stage cover is a great option for an outdoor event. It offers a lightweight and easy way to protect your stage and entertainment from the elements and draws the crowd's eyes exactly where you want it.

The inflatable cover is:

- Compact when deflated, so it can be moved through smallest of accessed areas.
- Quick to set up – requiring a small crew with only 30 minutes to inflate when in position.
- Versatile mounted so it can attach to a platform or stage or directly on to the ground.
- The dome is a fixed size, measuring 8x5 metres internally when inflated. Truss structures can be used on the inside for sound, lighting, banners and FX requirements.

## Extras...

- Safety rails
- Steps
- Skirting
- Crowd barriers
- Dance poles
- Carpet or vinyl flooring
- PA risers
- Front of house positions

There is a host of accessories we provide with our staging to give your event the finish or functionality it needs.

If it's not mentioned here, we may have it or be able to get hold of it so just ask!

We would love to work with you to make your event a resounding success, so please do get in touch.

# Contact Us...

We would love to speak to you about your regular productions or one-off events and see where we can help.

We work with production compaines and venues across the UK and are happy to provide set up and crew, as well as dry hire options.
